## Background

In 2019, the nonwovens industry in China has achieved steady development despite various challenges. According to the data of the National Bureau of statistics, the output of Nonwovens in the first nine months reached 3.77 million tons, up 13.5% year on year. At the same time, during this period, China's nonwovens export volume reached to 767800 tons, with a value of \$2.287 billion, an increase of 8.01% and 6.17% year-on-year, respectively, which shows that the global market demand for nonwovens is still strong, and China is further enhancing its global competitive advantage. On the other hand, from the perspective of terminal applications, sanitary products, wet wipes, mask and other markets in China have entered a transitional period, facing the situation of overcapacity, product homogenization and fierce competition.

In order to help the nonwoven manufacturers and end users adjust their development ideas and find inspiration for high-end and differentiated products, Ringier will organize Nonwoven **Technology Innovation Application Summit 2020** in Shanghai on 29-30 July, bringing together manufacturers of diapers, female hygiene products, adult incontinence products, wipes, facial mask, medical products and non-woven coil manufacturers from equipment to raw materials. Suppliers and other upstream and downstream enterprises will focus on hot topics from raw materials and additives, fiber, processing equipment to coiled materials and products, share and discuss new technologies, application cases and channel methods to help you achieve business development and innovation.

## Hybrid Event 复合型研讨会

To meet the needs of delegates across the country who for various reasons may still face restrictions or concerns in attending a physical event - delegates will have the option to participate in the conference in a virtual setting in real time - after registration and selecting various payment -access options. they will be able to post questions and engage with the presenter in the same manner as other onsite delegates.

## Expert Consultant

**Mr. Yang Xiang**  
Chairman  
Professor-Level Senior Engineer  
China Nonwovens association

**Mr. Jin Xiang Yu**  
Professor, Nonwovens R&D Center  
Textile College Nonwovens  
Engineering Dept.

## Highlights

## Epidemic Prevention and Control Steps

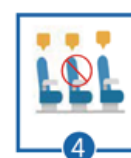

**1**  
Wear Surgical Mask at all time

**2**  
Hand Sanitizer Available

**3**  
Measure Body Temperature upon entrance

**4**  
More Space between seats

**5**  
Limit Contact with Outdoor Objects

**6**  
Keep ventilation

**7**  
No food Sharing

**8**  
Frequent hand washing

## Hot Topics

### Market & Trends

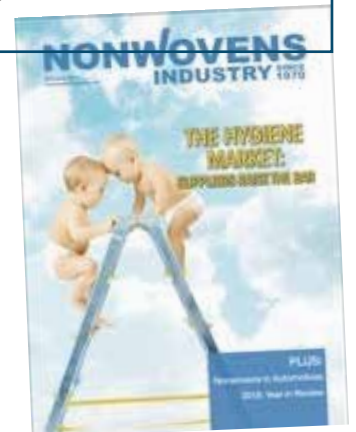

- Analysis on the current situation and trend of Chinese sanitary products market
- Influence of trade disputes between China and the US on non-woven industry and Countermeasures
- The impact of infectious diseases on the industrial chain of non-woven and the integrated countermeasures
- Development trend and standard work of nonwovens industry at home and abroad
- The high-end development of Chinese diaper Enterprises
- The current situation of population aging and the impact of policy changes on the adult incontinence market
- How to implement the green sustainable development strategy of nonwovens
- Personal care wipes: category innovation based on consumer demand
- Go global and focus on overseas emerging markets

### Materials & Equipment

- Application of bio based green fiber in nonwovens
- Nonwoven punching and embossing techniques: improve product differentiation
- New development of surface materials: natural, skin friendly and personalized health products
- The innovative application of spun laced nonwovens and needled nonwovens in wipes
- The technical progress of auxiliaries at home and abroad that improves the function of non-woven fabrics
- Case study: how does intelligent and customized manufacturing help Nonwovens
- Antibacterial solution for wipes to make consumers more comfortable
- Study on the adsorption properties of non-woven fabrics and its application
- The technological innovation of ultrasonic in the process of nonwovens' combination

### Productions & Solutions

- Innovative design of flow guide layer in diapers
- New technology to improve the function of diaper core
- Diaper structure design improves the fit of the product
- Case analysis of soft diapers
- Differential innovation of female health products
- Odor control solutions in sanitary products
- The development of tampon at home and abroad
- The future of sustainable wipes
- Innovative solution of spinning and fusing technologies based on the change of market
- Production process requirements of washable products
- Application status and trend of hot air nonwovens in sanitary materials
- Standard and test of medical textiles
- Selection and innovation of non-woven substrate for mask
- Differentiated development of tissue products and transformation and upgrading of enterprises
- Application of Intelligent Manufacturing in tissue industry
- Research progress and application of bicomponent and fine denier spunbond technologies
- Low cost and high efficiency SMS composite technologies

## Conference highlights

### - Grasp Innovative Technology and Insight Into Development Trend

Discuss the impact of policies on industries and enterprises. Fully understand the latest industry technology in the industry, and discuss the future development trend of the industry with top enterprises.

### - Learn The Latest Industry Experience and Application

Learn the most advanced industry manufacturing solutions and application examples, and interact with industry experts to stimulate new ideas.

### - Planning The Future Development of The enterprise

Listen to the most authoritative and experienced experts in the industry to share and learn the practical preparations for enterprise development and deployment.

### - win-win cooperation

Fully discuss with business partners and peers to seek new opportunities for business cooperation. Build a mutually beneficial and win-win cooperation relationship to prepare for the future strategic promotion of the enterprise.

### - Featured activities

The conference involves leading technologies and applications in Nonwovens industry. 200 + participants cover the whole industry chain, case analysis, keynote speech and round table forum

## Who will attend?

- **End users**, baby diapers, adult incontinence products, women's hygiene products, masks, wipes manufacturing enterprises
- **Nonwovens manufacturer**, Spunlace, hot air, spinning and melting, melt blowing, air flow forming net, composite
- **Supplier**, Nonwoven production line supplier / fiber and fiber technology supplier / auxiliary supplier / raw material and auxiliary material supplier, etc
- **Testing equipment and software, instrument, standard service, software service and other service providers**
- **Government, association, college, academic and scientific research institutions**

## Previous Speakers

**Xiang Yang**

## About Us

 Ringier Events

Connecting industry through information exchange!

**Ringier Trade Media Ltd.**

Ringier Events covers the industries of plastics, food&beverage, personal care, nonwovens, coatings & ink, automobiles, metal, mold & die, package, composite materials, Smart Manufacturing and the latest technologies. We organize high level conferences bringing industry leaders together for information exchange and networking opportunities. Conferences organized by Ringier not only provide industry leaders with the latest technologies, but also help China enterprises innovatively explore new markets.
