PLASTINDIA 2015

DESTINATION Gandhinagar, Plastics Industry to Benefit

PLASTINDIA 2015 is all set to create new milestones, and scale newer heights as has been the tradition of every PLASTINDIA exhibition. The strong growth that the plastics industry has witnessed in

the recent past and continues to do so today will only help in making this PLASTINDIA, a resounding success.

PLASTINDIA exhibitions have always been the cornerstone of the

exponential growth that this sunrise industry has witnessed. The sheer numbers are overwhelming.

Over **2000** exhibitors and **1,50,000** visitors from over **40** countries.

Subhash Kadakia
President
Plastindia Foundation

Says...
The 9th edition of Plastindia at Gandhinagar will bring the new venue to global attention as an exhibition ground created and developed as per international standards. I assure you, that overall, it will benefit the future of plastics industry and your participation will be value for money.

JJ Plastalloy Pvt. Ltd.

Quality Masterbatches from Leading Manufacturer & Exporter of Wide Range of Masterbatches

Entire Range Under Our Roof

- Additive Masterbatches
- Black Masterbatches
- White Masterbatches
- Calcium Carbonate Masterbatches
- Color Masterbatches

Our Advantages

- Govt. Approved R&D Center
- Govt. Recognized Export House
- Consistent Quality
- Fast Product Development
- Export to more than 25 Countries

Distributor Enquiries Solicited

FROM THE DESK OF
THE PRESIDENT

Subhash Kadakia
President

Dear Exhibitors of Plastindia 2015, Visitors and Stakeholders of the Plastics Industry,

Greetings!

The only thing constant in life is change! Every change brings with itself opportunities as well as challenges. A PLASTINDIA exhibition in Gandhinagar is one such change, infact a pioneering change! The exhibitors and visitors at Plastindia 2015 will have an opportunity to witness an expansive infrastructure and the convenience it brings to them.

At Gandhinagar, the ultra-modern venue has air-conditioned halls that are roomy and come with a convenient layout, created for ease of crowd movement. Ample parking space will be another plus.

The concerns relating to convenience of inbound travel, local commute and availability of accommodation are all being aggressively addressed. Quite certainly, a number of international and domestic airlines are in agreement to increase flights to and from Ahmedabad; local commute arrangements are being organised with leading service providers and stay arrangements are being finalised. Visit our website for updated information in this regard.

I fully understand and appreciate your concerns, all of which remain a top priority for me to address as President and infact, for everybody at PLASTINDIA. I assure you that this PLASTINDIA exhibition will be a very memorable affair for exhibitors and visitors alike, with business scaling newer heights.

For new booth requests, we would try our best to see the accommodation possibilities and revert. With unflinching support of National and overseas partners, the Central Government and the State Government, we are confident of adding substantial value to your business.

As we have done in the past, it is time again to showcase to the world, the power and intellect of the Indian polymer industry; it's time to 'MAKE IN INDIA' ... it's time for PLASTINDIA 2015.

To sign off, at Gandhinagar, PLASTINDIA 2015 is most certainly going to get bigger and better...be a part of this mega event as it's time to expand your horizon.

Looking forward to meeting you at PLASTINDIA 2015!

French Plastics Industry Experts

@ PLASTINDIA 2015

As the foremost tradeshow in the plastics sector, PLASTINDIA is a highly anticipated event among French professionals, for it only happens once every three years. Ubifrance, the French agency for international business development, will be organising a French Pavilion at the PLASTINDIA 2015 tradeshow at Ahmedabad between 5th and 10th February, 2015.

The 5 companies that will gather at the French Pavilion will well represent the various sectors in the industry. Attracted by the Indian market's high growth rate, they will be presenting their technology and their know-how to Indian professionals in order to secure commercial contacts. Come and meet them at Booth C22 in Hall No. 11.

Action Packed and Opportunity Driven Plastindia 2015 Beckons the Global Plastics Industry

With Gandhinagar as the venue, a very rewarding and pleasant experience awaits exhibitors, visitors and conference delegates.

The world's attention now turns to Plastindia 2015 which has reared an international impact as the third largest plastics show in the world. The Indian plastics and allied industry as well as companies worldwide are looking forward to this event.

The highlight of Plastindia 2015 is the new ultra-modern exhibition facility at Gandhinagar, in close proximity to Mahatma Mandir, a globally renowned Convention Centre.

Undoubtedly, innovation is the surest way to success in today's time. Plastindia 2015 has taken this further and for the 1st time, a pavilion dedicated to 'Innovation' will draw global audience. This will surely enthuse a kind of inspirational

spirit and encourage people to engage in innovative and creative pursuits. The pavilion will bring to the fore, innovations done by the Indian plastics industry as well as rich R&D work done by the Indian institutes involved in polymer science. With an overwhelming response to this unique concept, this surely is set to be one of the highlights of Plastindia 2015.

Action Galore

The programme from 5th to 10th February, 2015 is packed with quality, variety and surely, with immense business opportunity. With the exhibition being an unparalleled showcase of new developments, innovation and promotional activities; the Foundation has lined up, in addition to the 5th Edition of PROPLAS, a number of programmes.

- Inauguration and Award Function on day one.
- International Conference and Gala Exhibitors' Nite on day two.
- Conference to continue on the day three along with the Asian Plastic Forum (APF) programme as well as a Seminar on Sustainability & Waste Management.

- On the next day is an interactive meeting with Wintech European Technology Transfer Cluster.

In addition to private conferences being organised by corporates (Indian and overseas), arrangements are being made for B2B meetings with business delegates from Asian Countries, Latin America, Europe, USA, Gulf Region etc.

All-Around Support

With the support of the Government of India, Ministry of Chemicals & Petrochemicals and State Government of Gujarat, the event is well supported by the founder members, as well as, international partners such as Messe Dusseldorf, Adsale of Hong Kong, and Pilatus of Taiwan. The event also sees support from EUROMAP. The Exhibition will witness number of country pavilions such as U.K., France, Australia, Germany, China, Taiwan etc.

Business, the Key Strength of Plastindia 2015

It is expected that actual business and serious business enquiry which could be generated at this event, could be

close to staggering Rs. 2500 crore (about US \$ 400 million).

Visitors, both in quality and numbers are key to the event's success. It is expected that 150,000 business visitors from India and 40 other countries would engage with exhibitors to grow their business. Over 100 road shows, both in India and overseas, have been conducted to attract the right audience. This is in addition to a myriad of communication channels engaged to reach out to the industry far and wide. Pre-event bulletins, show dailies and special features in plastics trade journals will continue to add vibrancy to the show.

With the assistance of the Government of Gujarat, timely readiness of the grounds is well on course, so also availability of ample accommodation (www.plastindia.org/hospitality). For convenience of exhibitors and visitors, for the first time, shuttle bus service is arranged from various vintage points from Ahmedabad and the surrounding areas, to the Exhibition venue and back. For enhanced comfort, during the event period, a large number of domestic and international flights will connect Ahmedabad.

To add, Gujarat Tourism will provide visitors a plethora of opportunities to witness the rich heritage of Vibrant Gujarat!

Kolkata

Indore

Ms May Chien, Director
Pilatus International
Company Limited

Plastindia 2015: A Very Good Platform for Indian and International Exhibitors

advanced facilities to all exhibitors to enjoy exhibiting successfully.

Q. You have had a strong association with Plastindia events. What role have they played towards the growth of the polymer industry?

The important role of Plastindia events is letting manufacturers display their products at the exhibition, and people can get updated with advances in polymer technology through the seminar. Plastindia events act as a bridge to strongly connect both the Indian and International polymer industry. This helps in growth and innovation of the polymer industry in many ways.

Q. As regards the participation from Taiwan, Singapore, Korea, Malaysia, Philippines and

Vietnam, please throw some light in context with Plastindia 2015.

For many years now, India imports a lot of machinery from Taiwan and Korea. The plastics industry is booming in SEA countries like Singapore, Malaysia, Philippines and Vietnam. All participants from these six countries are looking forward to increasing their business in India. Many of them are confident of the Indian market and have invested more to establish their own offices and even factories in India; India will be among the top 5 consumer markets in the world by 2025.

Q. Any specific plans for Plastindia 2015?

At Plastindia 2015, Pilatus will make Taiwan and Asia Pavilions in Hall 12A. For enhanced exposure of Pilatus's exhibitors, we will

do spot advertisements at the fairground and also have hanging banners inside Hall 12A. We want to attract more buyers to visit our exhibitors during the exhibitions.

Q. This event, for the 1st time, is being held in the state of Gujarat at a brand new world-class venue...looking forward?

We visited the new exhibition centre in Gujarat which is a world-class venue, thus, we definitely look forward to exhibit at this new venue. We are expecting more improvement in aero traffic, wherein the state of Gujarat will allow more international flights to go to Ahmedabad directly. This will help exhibitors and visitors to visit the exhibition very conveniently.

Two Platen Injection Moulding Technology Showcased at the Windsor Open House

In its journey of 50 years, Windsor has unveiled many new machine technologies in India, thereby giving its customers a new horizon to maximise profits.

In continuation, Windsor acquired Italtech, an Italian giant, to deliver next-gen two platen injection moulding machines. To showcase technological strength of the innovative KL

series two platen machine, an Open House was organised at their Chhatral plant between 18th and 19th September, 2014.

The event was a great success as many customers, consultants and technocrats witnessed the live demonstration of the KL 800 tonne machine producing 4.6 kg industrial pallet. This event was inaugurated by Mr. Prakash Patel, Chairman; Mr. Bhavesh Patel; Mr. Shailesh Patel and Mr. Hireen Patel, Directors on Board of Varmora Plastech Pvt. Ltd.; Mr. T. S. Rajan, CEO and Mr. Nitin Chowdhary, Dy. CEO

PLASTINDIA 2015: DESTINATION Gandhinagar...

continued from page 1

Between 2013 and 2020, in India, plastics consumption is set to increase from 12 MMTA to 20 MMTA; exports from USD 6 billion to 8 billion as well as direct and indirect employment from 1.2 million to 2 million. So surely, 1,50,000 visitors would congregate at Plastindia 2015 to visit the world's finest 2000 exhibitors spread over a sprawling 1,25,000 sq. mts. at Gandhinagar, Gujarat.

Gandhinagar is home to one of the most elaborate exhibiting infrastructure and the internationally acclaimed Mahatma Mandir Convention Centre. The exhibitors of Plastindia 2015 will witness this

expansive infrastructure and the convenience it brings to them and to their visiting customers. This ultra-modern venue has air-conditioned halls (high load bearing capacity) that are roomy (7 to 18 metres high) and come with a convenient layout, created for ease of crowd movement. Ample parking

Says...

Saurabh Patel
State Cabinet Minister,
Government of Gujarat

We are expecting over 1.5 lakh visitors to the show and hope to generate business to the tune of Rs. 2000 crore. I assure you that the Government of Gujarat will provide every support to make Plastindia 2015, a huge success.

space will be another plus.

Locational convenience will surely act as a strong motivator for an unprecedented visitor footfall, especially when Gujarat and its near surroundings itself constitute a significant 60% of the Indian plastics industry. This fact will singularly ensure both, quality and quantity of visitors resulting in sheer exhibitor delight.

Gandhinagar, located just 16 kms from Ahmedabad, is one of the most modern and well planned cities in India with wide avenues and ample greenery and is designed by a well known French architect. It comes with convenient road, rail and air connections for ease of access. With one of the best port facilities in the country, it will ensure smooth movement of cargo as well.

With unflinching support of National and overseas partners, Central Government and State Government, we are confident of adding substantial value to your business.

PLASTINDIA 2015 concurrent events include:

- **PROPLAST:** This 5th edition event is the final word in processed plastics, the heart of India's plastics industry. PROPLAST is a showcase of India's burgeoning plastics processing capability. It demonstrates the high standards that are consistently delivered by Indian processors across the globe.
- **Conference:** The 9th International Conference will host some of the most renowned experts on plastics. World leaders in plastics are looking forward to sharing their experience, knowledge, expertise and share views with international audience through this conference.
- **Plasticon Awards:** The 7th Plasticon Awards will be held, where the best and brightest from the Indian plastics industry will be felicitated for their accomplishments and excellence across 23 categories.

**GANDHINAGAR
WORLD CLASS
FACILITIES**

High Speed, High Productivity, High Profit for India's Plastics Film Producers from Brückner

At Plastindia 2015, German Brückner Maschinenbau GmbH (Hall 8, Booth E07) will present latest solutions that will help film producers to optimise their performance.

Brückner's latest BOPET lines are operated at speeds above 500 m/min. At Plastindia, Brückner will show developments which improve the film quality, the handling and the efficiency of the line. For example, the recently introduced, advanced pinning system and the highly reliable chain track system in the transverse direction orienter (TDO), providing unparalleled stability during operations at high-speeds.

BOPA films for food packaging as well as for applications in the medical sector are of increasing interest for the Indian markets as they offer plenty of advantages due to their good barrier properties towards gases, flavour and odour. At Plastindia 2015, visitors will get latest information about lines for the manufacture of high-quality BOPP films which can achieve unreached working speeds above 500 m/min.

All line developments include brand-new energy saving measures in both, thermal and electrical respect. One of the highlights will be the 'Intelligent Line Management' (ILM) including an energy monitor for measuring and analysing the energy consumption of the film production process based on the international standard ISO 50001.

Erhard Wienkamp
Division Director, Messe Düsseldorf GmbH

Plastindia 2015 to Showcase Forward-Looking Ideas and Inspirations

The who's who of the world-famous German plastics and rubber industries will participate and showcase their latest outstanding product ideas, says Erhard Wienkamp.

Q. You have a strong association with Plastindia events. What role have they played towards the growth of the polymer industry?

The Plastindia Foundation and Messe Düsseldorf have been working together since the first Plastindia in 1990. As an overseas associate, Messe Düsseldorf will again take care of the European, Japanese and US exhibitors and also of some participants of the Gulf region. The Indian market is considered to provide excellent opportunities: the fast growing, consumption-friendly middle classes, infrastructural

expansion, investment in medical and health services and an expanding leisure industry generate a significant demand for plastic parts and packaging as well as for production machinery and raw materials. Plastindia is the flagship event in this interesting market, with a vision of taking the industry forward on its path towards becoming one of the fastest growing sectors in India.

Q. Plastindia 2015, what are your thoughts on the 9th Edition of this mega event?

The short-term change of the venue has been a challenge. Everyone involved – organiser, partners, exhibitors and visitors – have to adapt to the circumstances at the new Exhibition Centre, Near Mahatma Mandir, Gandhinagar. The announcements regarding the modern venue, the

air-conditioned halls and the well-planned infrastructure have stirred great expectations. Messe Düsseldorf and all exhibitors are looking forward that the venue operators will keep their promises.

We are very happy that we are able to contribute once again significantly to the success of Plastindia. We are organising six national participations – from Austria, France, Germany, Italy, Switzerland and UK – and are taking care of many individual exhibitors. Some 200 companies from Europe and the Americas will follow us to Plastindia 2015. The presentations of these companies will fill Hall 8 completely and a major part of Hall 11.

Q. As regards the German participation, please throw some light.

The presentation of the German exhibitors will be once again one of the highlights of Plastindia. The who's who of the world-famous German plastics and rubber industries will participate and showcase their latest outstanding product ideas.

Q. Any specific plans for Plastindia 2015?

I am convinced that Plastindia 2015 will continue to play its vital role in the growth of India's economy. The international exhibitors stand for a global overview on innovative products and solutions. All the experts travelling to the new exhibition centre

in Gandhinagar in order to learn about the latest technologies will be able to take home a wealth of forward-looking ideas and inspirations for developing their business.

Q. Looking forward to the new venue?

The premiere of Plastindia at the new exhibition centre is a major challenge for everyone involved. I see a great chance that Plastindia will profit of the fact that it now takes place in the heart of the Indian plastics processors industry. I hope that the experts not only from Gujarat, but from all parts of the country will come to experience the high-level presentations of the exhibitors and become part of the dynamic progress of the Indian plastics and rubber industries.

M. P. Taparia, Managing Director
Supreme Industries Limited

It is heartening to note that Gujarat Government took the challenge to build a Fair Ground, commensurate with requirements of an international business exhibition at Gandhinagar. We congratulate the President and Managing Committee of Plastindia Foundation to commit to this herculean task to shift this exhibition from Delhi to Gandhinagar.

Two Platen Injection Moulding Technology...

continued from page 5

from Windsor Machines Limited and Mr. Massimo Pegoraro, CEO, Italtech were present to grace the event.

On display, were EXCEL-180 machine producing multi-cavity container and EXCEL-130 machine processing engineering plastics to produce casing for electrical spike guard.

The KL Series machines are available in the clamp force range of 350 to 8000 tonne. The machines offer many value-added features for customer benefits. Few machine attributes are as follows:

- Machine footprint reduction between 15 - 20% space saving.
- Free, suspended and short tie bars without the need of lubrication, making the machine clean.
- Fast cycling operation due to close loop function of clamp and injection movements, increasing productivity.
- Optimised platen weights reduce energy demand for movements.
- Patented jaw clamping system for synchronised movement of split nuts. This prevents banging of nuts on tie bars and improves nut and tie bar life.
- Larger mould weight carrying capacity.
- Free moving platen and easy adjustment of parallelism.
- Servo hydraulic driven system for energy reduction.
- Advanced Control System to help in quick process set-ups.

The event created a platform of knowledge sharing and fruitful interaction. Many customers and industry technocrats witnessed the technological advantage of the new machines and appreciated the unveiling of the latest two platen injection moulding technology.
