Conference Background

Guangdong is known as a 'big' coatings province. In the first half of 2019, the total output of China's coatings industry was 9 million 644 thousand and 500 tons, of which Guangdong's production exceeded 20%, ranking first. However, in the 2019 ranking list of China's top 100 coatings enterprises, 22 enterprises in Shanghai were listed in the list of the top 100 enterprises in China, whose total sales revenue reached 67 billion yuan, accounting for 48.88% of the total list. In the meanwhile, 19 enterprises in Guangdong Province were selected, with a total sales income of 18 billion 300 million yuan, accounting for 13.36% of the total list, ranking second. It can be seen that though the number of coating enterprises in Guangdong is large, the average output value of enterprises is not very high. With the increase of raw material prices, the strictness of environmental protection and safety policies, the international trade war and so on, the superposition of various unfavorable factors have made the coatings industry in Guangzhou suddenly face a development glacier.

How can Guangdong transform from a big coatings province to a strong coatings province? Promoting transformation through environmental protection, developing through green mythology, speeding up product innovation, and upgrading enterprises are the only ways for future development. Under this background, the **"2020 Innovative Coatings Summit"** will be held on 11-12 August. With the theme of **"innovation-driven, green development"**, the conference sets up three sessions: water-borne coatings, UV coatings and functional coatings. It will discuss 25 + hot topics such as market trends, industry regulations, innovative technologies, and application cases in the coatings industry. It will provide a platform for the ideological collision of coaters and help the coatings enterprises to transform and upgrade.

Why You Should Attend

- 
- **3 Parallel sessions:** water-borne coatings, UV coatings, functional coatings
 - **20 + booths** showcasing innovative products and technologies
 - **25 + hot topics**, industry experts sharing best practices
 - **300 + industry colleagues**, integration of production, learning, research and innovation technologies
 - **Supported by professional organizations** and advisory committee from domestic and overseas
 - **On-site buyer-supplier** match making service
 - **Expo and technical seminars**

Who Will Attend

- Coatings manufacturers/Agency (water-borne coatings, UV coatings, functional coatings)
- End users (furniture, shipbuilding, transportation equipment, automobiles, printing, 3C electronics, etc.)
- Coatings raw material suppliers (all kinds of resins, latexes, auxiliaries, pigments, solvents, etc.)
- Machinery and equipment manufacturers (coatings production equipment, processing equipment, testing equipment, spraying equipment, etc.)
- Research institutions (Coatings Society, Coatings Association, University, Coatings Research Institute, Coatings Research and Development Center, etc.)
- Others

Thank you very much for Ringier. We hope to know more industry experts through this platform. We will pay more attention to it and strive for more opportunities for cooperation. Thank you again!

—Zhongshan Doit Coatings Co., Lit

Hot Topics

- Market analysis, application status and development trend of green coatings
- Interpretation of the latest standards of environmental regulations for coatings and ink enterprises in 2020
- Ideas and ways to control the VOC source in coatings industry
- Conception and practice of digital intelligent coatings plant
- Frontier technologies, performance testing methods and innovative applications of environmentally friendly coatings raw materials
- The latest technology and development trend of green coatings at home and abroad

Waterborne Coatings Session

- Analysis of characteristics of waterborne coatings market and share of application cases
- Application of pigment nanotechnology in waterborne automotive repair coatings
- Latest research and development prospects of waterborne epoxy technologies
- Formulation design, production process and application of waterborne anticorrosive coatings
- Key technologies for successful waterborne industrial anti-corrosion coatings
- Analysis and new breakthroughs of water-in-water and sand-in-water multicolor coatings
- Rapid film formation of waterborne materials under high humidity conditions
- Formulation design of water-borne two-component wood coatings
- Development of waterborne acrylic industrial coatings
- Technical application of waterborne resin, emulsion and auxiliaries in coatings formulation design

The Summit can bring together experts in coatings industry. The exchange is well organized and fruitful.

—Shunde Jinguan Coatings

”

Functional Coatings Session

- Market changes and technological advances in waterproof/fireproof coatings
- Development and application of heat-reflective and heat-insulating coatings
- Application and evaluation of graphene in functional coatings
- The latest anti-ENI coating solutions in 5G industry
- Research and application of two-component anti-bacterial and anti-graffiti architectural coatings
- Technical status and prospects of inorganic coatings at home and abroad

UV Coatings Session

- Overview of research and application of UV coatings at home and abroad
- Application of UV curing in plastic film and optical film
- Waterborne LED UV curable wood coatings
- UV Printing Technology Based on UV Paint
- Research and development of high efficiency, low yellowing and low odor LED photo initiator
- Preparation and properties of bio-based UV coatings

List of Previous Speakers

Ms. Shi Qiu
Waterborne Platform
Representative of Market Committee

Mr. Jiong Guang Ye
Executive Vice Secretary-General
Guangdong Green Supply Chain Association

Mr. Si Peng Wang
Deputy Technical Director
Yingde Keytec Colors Co.,Ltd.

Mr. Yong Xian Liang
Advanced Engineer
Shenzhen Environmental Research Institute

Mr. Chun Feng Ma
Professor
Doctoral Supervisor, South China
University of Technology

Mr. Ji bin Pu
Researcher
Ningbo Institute of Materials
Technology& Engineering, CAS

Mr. Xin Ya Zhang
Technical Director
Guangzhou Carpoly New Materials Co., Ltd.

Mr. John Huang
GM
SYNTHRON

Ms. Su Zhou
Technical Manager of Metal Coatings Industry
DSM Resin

Mr. Guo Ping Shi
APAC Wood coating AD Manager
Covestro

Mr. Zuo Pan
Research Director
CIMC Research Institute

Mr. Shao Xiang Fu
R&D Director
3trees Paint Co., Ltd

List of Previous Speakers

Mr. Jian Wen Yang
Associate Professor, Doctor Supervisor
Zhongshan University
Vice President, Chinese Society for Imaging
Science and Technology

Mr. Kyoho Zhong
Technical Manager
GuangZhou Guangchuan Electronic Materials Co.Ltd.

Mr. Raymond Zheng
General Manager
Zhongshan Jesida Fine Chemicals Co., Ltd

Mr. Wen Hao Li
LED Technical Manager
ShenzhenUV-ChemTech LTD

Ms. Flora Yuan
President
Guangzhou Sunnyvale New Materials Co.,Ltd.

Mr. Xiao Xuan Liu
Professor
Guangdong University of Technology

Mr. Hong Jiang Zhu
Technical Director
Guangdong Sifang-victory New Materials Co., Ltd.

Mr. Ben Jin Deng
Technical Marketing and Training Manager
Jotun coatings (Zhangjiagang) Co. Ltd.

Mr. Jin Zeng
Deputy General Manager
Foshan Shunde Hongchang
Coating Industrial Co.,Ltd

Mr. Xing Hong Jia
General Manager
Xi'an Lv Yang Environmental Protection
Technology Co., Ltd.

Mr. Xiao Dong Zhang
Vice director of State Key Laboratory of
Environment Adaptability for Industrial
Products, China National Electric Apparatus
Research Institute Co., Ltd.

Mr. Wei Zhong Jiang
General Manager
Guangzhou Sysmyk New Material Technology Co.,Ltd

Partial List of Previous Delegates
